A2L Steps to Success - Rheem

Class description:

This training will walk through the key things technicians need to know for successful installations and service of A2L refrigerants. The training will also dispel common myths with facts about A2L that technicians can rely on. In this training technicians will be provided with links and resources to help their team with this transition.

M1 Contractor App - Rheem

Class description:

This training introduces the Contractor App, overviews its functionality, and instructs how technicians will install, maintain and service the new Endeavor platform Bluetooth equipment using the app.

Brazing Aluminum

Class description:

This training looks at tools and products available to braze aluminum to aluminum and aluminum to copper. Also a hands on portion of the class that allows the student to repair a coil.
